

Architected parameterized SQL query with subquery filtering

Here's an interactive breakdown of the query — all three parameters are live-editable and reflect instantly in the SQL.

PARAMETERS

Region :region Pacific Northwest

Min sales :min_sales 50000

Start date :start_date 01/01/2024

QUERY

```
SELECT
    r.rep_id,
    r.name,
    r.region,
    agg.total_sales
FROM sales_reps r
JOIN (
    SELECT
        rep_id,
        SUM(amount) AS total_sales
    FROM sales
    WHERE region = :region -- 'Pacific Northwest'
        AND sale_date >= :start_date -- 2024-01-01
    GROUP BY rep_id
    HAVING SUM(amount) > :min_sales -- 50,000
) AS agg ON agg.rep_id = r.rep_id
WHERE r.region = :region
ORDER BY agg.total_sales DESC
```
